

Migraine Meanderings hosted a poll that asked members of its online community how often they currently have migraine attacks.

### CURRENT NUMBER OF MIGRAINE DAYS/MONTH ON AVERAGE

*"Life with daily chronic migraine with preventive and abortive medications is no picnic!*

*—Migraine Patient*

951 people voted in the online poll.

#### HIGHLIGHTS

Fifty-eight percent of respondents report having chronic migraine with 15 or more migraine days per month. Another 40% report episodic migraine—with 21% having high frequency with 8-14 days per month, and 19% having low frequency with 1-7 days. And about 2% of the voters report occasional migraine attacks.

The responses to this poll show that members of the Migraine Meanderings online community are impacted by migraine many days of the month. This debilitating disease takes a toll on patients and affects all aspects of their lives.
